

Primates

Agent concentrates

Feed number: 2988

Suitable for: Primates

YOUR BENEFITS

- ◇ Vitamin- and mineral concentrate
- ◇ Contains organic sources of zinc, iron and selenium
- ◇ Contains inositol (0.5%)
- ◇ Contains methionine and lysine
- ◇ To supplement the ration in case of reduced feed intake
- ◇ Ideal for supplementing the basic diet in case of higher need due to special life stages (pregnancy, lactation) or during recovery

We are happy to work with you to create an individual feeding recommendation

TYPE OF FEED, FORM, DELIVERY QUANTITY

- ◇ Supplementary feed
- ◇ Form: powder
- ◇ Delivery quantity: 1 kg box
- ◇ Product number: 2988.MA.BU1
- ◇ Storage: Storage: dry (<75% humidity), dark (no direct sunlight) and cool (10-25°C) or ideally in the fridge (2-8°C).

Primates

Agent concentrates

Feed number: 2988

FEED SPECIFICATIONS

Major nutrients (%)

Dry matter	93
Crude protein	3.5
Crude fat	0
Crude fiber	0
Crude ash	20.5
NFE	75

Amino acids (%)

Arginine	0
Lysine	2
Methionine	0.4
Methionine + Cystine	0.4
Tryptophan	0
Threonine	0

Ingredients

Dextrose, calcium carbonate, monopotassiumphosphate, monocalciumphosphate, sodium chlorid, magnesium sulfate, amino acids, inositol, vitamins, trace elements, flavour

Energy (MJ/kg)

GE	12.9
ME	12.1

Macrominerals (%)

Calcium	5
Phosphorus	2
Magnesium	0.4
Sodium	1.3
Potassium	1.3
Chlorine	2.6

Trace elements (mg/kg)

Iron	1150
Zinc	437
Copper	152
Iodine	2
Cobalt	1.5
Manganese	437
Selenium	1.6

Vitamins (added, mg/kg)

Vitamin A (IU/KG)	300'000
Vitamin D3 (IU/KG)	100'000
Vitamin E	2000
Vitamin K3	70
Vitamin B1	180
Vitamin B2	240
Vitamin B6	170
Vitamin B12	2.5
Nicotinic acid	960
Pantothenic acid	570
Folid acid	190
Biotin	4
Choline	10'800
Vitamin C	3500

Remarks

- ◇ Given values are calculated averages in air-dry feed.
- ◇ GE calculated according to Kamphues et al. 2014. GE=gross energy, ME=metabolisable energy. metabolisable energy calculated according to Atwater factors
- ◇ Trace elements: calculated total content. Vitamin declaration: vitamins added before production. Estimated total vitamin content for ration calculations on request.
- ◇ Nutrients are subject to natural variation of the raw materials and their production process.

OUR FEED RECOMMENDATION

- ◇ For convalescence, lactation, or other situations with increased requirements, administer up to 2g powder/kg body weight per day, depending on the total ration.
- ◇ For rations without other supplements (pure fresh food rations consisting of vegetables/leaves/insects): Powder quantity: approx. 5% of the dry matter in the ration.
- ◇ The supplement is very concentrated – precise calculation and feeding per animal is necessary.
- ◇ Can be mixed into the feed as a powder or dissolved in a little liquid.
- ◇ Always provide water freely.

It is recommended to use the pellet in an enriched feeding management that maximizes the animals' feeding time
